PROFESSIONAL SUMMARY

Frontend WordPress Developer with 8 years of experience building, maintaining, and optimizing WordPress websites, including managing multiple sites concurrently to ensure stability, performance, and security. Skilled in custom theme development, ACF, Custom Post Types, Gutenberg blocks, PHP, HTML, CSS, JavaScript, and jQuery, with a strong track record in technical and on-page SEO, Core Web Vitals-focused performance optimization, and translating Figma/PSD designs into responsive, production-ready websites. Experienced in setting up and using Google Analytics (GA4), Google Search Console, and Google Tag Manager to support data-driven decisions, and comfortable collaborating with SEO and UX teams on conversion-focused improvements. Strong communicator accustomed to working directly with non-technical stakeholders, resolving helpdesk-style requests, and documenting fixes for ongoing website operations.

TECHNICAL SKILLS

Languages & Markup: HTML5, CSS3, JavaScript (ES6+), jQuery, PHP

WordPress Development: Custom Theme Development, Custom Post Types, Advanced Custom Fields (ACF / ACF Pro), Gutenberg / Custom Block Development, WooCommerce, Template Hierarchy, Hooks & Filters, Reusable Component Templates

Design-to-Code: Figma, Adobe Photoshop (PSD)

SEO & Analytics Tools: Yoast SEO, Google Analytics (GA4), Google Search Console, Google Tag Manager, XML Sitemaps, Indexing Controls

Other: Articulate Storyline (e-learning module development)

PROFESSIONAL EXPERIENCE

Frontend Web Developer — Echo Web Solutions

November 2022 – July 2026

- Developed and maintained responsive WordPress websites using HTML5, CSS3, PHP, JavaScript, and jQuery.
- Built flexible WordPress page structures using ACF, Custom Post Types, Gutenberg blocks, and reusable templates.
- Customized WordPress themes, plugins, templates, and functionality according to design, content, and business requirements.
- Implemented SEO-friendly page structures, heading hierarchy, metadata, image optimization, internal linking, and content organization.
- Used Yoast SEO and WordPress SEO settings to manage title and meta optimization, XML sitemaps, and indexing controls.
- Improved website performance through front-end optimization, image optimization, asset management, caching considerations, and Core Web Vitals-focused improvements.
- Troubleshoot responsive, frontend, WordPress, and browser compatibility issues while maintaining existing website functionality.
- Translated Figma/PSD designs into responsive, production-ready WordPress pages.
- Performed ongoing website maintenance, including content updates, plugin/theme updates, and bug fixes.
- Coordinated with designers and stakeholders to ensure pixel-accurate implementation of approved designs.

- Managed and maintained multiple WordPress websites concurrently, ensuring consistent performance, security, and uptime across all sites.
- Set up and configured Google Analytics (GA4), Google Search Console, and Google Tag Manager to track site performance and support data-driven optimization.
- Supported the SEO team on conversion rate optimization (CRO) and UX-focused improvements to enhance user engagement.

Web Developer — Mindfus Inc.

October 2019 – October 2022

- Converted PSD and Figma designs into responsive WordPress websites.
- Handled both frontend and backend website development, maintenance, and troubleshooting.
- Built and customized WordPress themes, templates, and website components.
- Supported website structure, usability, performance, and SEO-friendly implementation.
- Collaborated on UI/UX implementation and resolved frontend and backend issues.
- Optimized on-page SEO elements including meta titles/descriptions, heading structure, and image ALT text.
- Contributed to website performance improvements through image optimization and code clean-up.
- Provided technical support and recurring maintenance for live client websites.

Frontend Developer — Miyens Technologies *July 2018 – September 2019*

(Internship: July 2018 – December 2018; Full-time: January 2019 – September 2019)

- Created WordPress websites using Divi and Elementor theme builders.
- Maintained WordPress websites and performed recurring content and technical updates.
- Created e-learning modules using Articulate Storyline.
- Assisted senior developers with responsive layout implementation and design-to-code conversion.
- Performed basic troubleshooting and quality-assurance testing across browsers and devices.
- Supported day-to-day website upkeep, including minor content edits and asset updates.

DETAILED SEO EXPERIENCE

- **On-Page SEO:** Optimized page titles, meta descriptions, heading hierarchy, URLs, image ALT text, internal links, and page content structure to support search visibility and usability.
- **WordPress SEO:** Used Yoast SEO and WordPress SEO settings to manage metadata, XML sitemaps, indexing-related settings, and search-engine-friendly page structures.
- **Technical SEO:** Addressed website structure, crawl-friendly implementation, responsive/mobile issues, broken page elements, URL-related issues, and technical website problems affecting usability and search visibility.
- **SEO-Friendly Development:** Developed semantic, responsive, maintainable WordPress templates with clean HTML/CSS and structured content to provide a strong technical foundation for SEO.
- **Website Performance:** Worked on front-end performance improvements including image optimization, CSS/JavaScript asset considerations, caching, and Core Web Vitals-focused improvements.
- **Internal Linking & Content Structure:** Implemented logical internal linking and organized page content using consistent heading structures and reusable WordPress components.
- **SEO Maintenance:** Maintained existing WordPress websites while preserving SEO-friendly URLs, metadata, content structure, internal links, and search-friendly page implementation.
- **SEO Troubleshooting:** Investigated and resolved WordPress frontend and technical issues affecting page rendering, responsiveness, performance, and overall website quality.

EDUCATION

Bachelor of Science in Information Technology
